NIMS Integration Center Announces Revised IS-800 Course on Website (IS-800a)

The NIMS Integration Center (NIC) in conjunction with the Emergency Management Institute (EMI) has updated the IS-800 National Response Plan (NRP): An Introduction, web-based training course to reflect the recent changes in the NRP. The updated course is now named IS-800a.

Emergency management personnel who have already completed IS-800 training as part of the FY06 NIMS compliance activities will not be required to retake the training. However, the NIC urges everyone, especially those who have completed IS-800, to review the changes to the NRP in the Notice of Change document and the NRP Quick Reference Guide posted on our website.

The IS-800 course has been removed from the website; however, answer sheets for that course will still be available and versions of the opscan form for this course still will be graded.

Please visit <http://www.training.fema.gov/EMIWeb/IS/is800a.asp> to access the new IS-800a course.
